

Wiro Bound Books

supplying guide for your wiro bound books

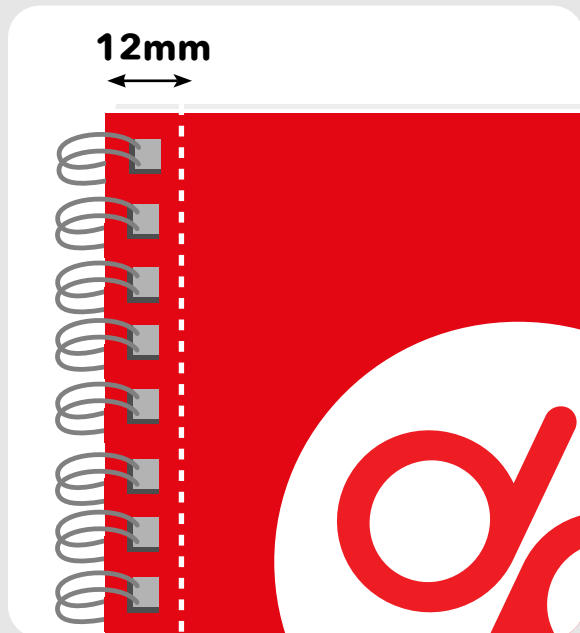

Leaves

Due to the type of binding we calculate the internal pages within a wiro bound document in 'leaves' rather than single pages. A leaf is simply one sheet of paper which has two sides.

Therefore, if your book has 30 pages, you would divide that total in half and end up with 15 leaves.

Safe Area / Margins

When designing a wiro bound book, please ensure that all important content and text is kept a minimum of 12mm from the bound edge of each page. This would be the left hand side for right hand pages and the right hand side for left hand pages.

Supplying your booklet

Please supply wiro bound documents as one multi-page PDF which consists of single pages running from the front cover through to the back cover, including any blank pages if needed.
