

# Wiro Bound Notebooks

supplying guide for your wiros bound notebooks

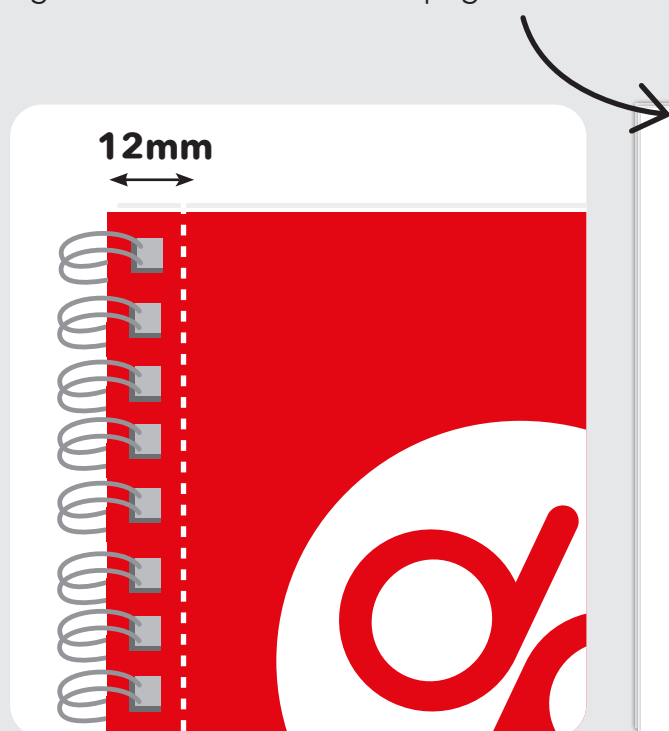

## Leaves

Due to the type of binding we calculate the internal pages within a wiros bound notebook in 'leaves' rather than single pages. A leaf is simply one sheet of paper which has two sides.

Therefore, if your book has 30 pages, you would divide that total in half and end up with 15 leaves.

## Safe Area / Margins

When designing a wiros bound notebook, please ensure that all important content and text is kept a minimum of 12mm from the bound edge of each page. This would be the left hand side for right hand pages and the right hand side for left hand pages.

## Supplying your notebook

Please supply print ready PDF containing the front and back cover of your artwork for your wiros bound notebook. **We will add the lined pages for your inner.**
