

A6 Landscape Left Inside Page

■ Bleed (3mm)

The bleed area extends 3mm beyond the edge of your finished document. Colours and images must extend beyond the edge of the document to prevent unwanted white borders around the edge of your finished document. Note that this 'bleed' will be trimmed during the finishing process so ensure that no important details are set up to print in this area

■ Safe Area (5mm)

it is recommended that your artwork is at least 5mm from the edge of the page if it is not meant to bleed off. Printed borders placed too close to the edge of a page may look uneven when the job is trimmed.

Important: Anything beyond the white dotted line will be trimmed off

digitalprinting.co.uk

The diagram shows a white rectangular page centered within a yellow border, which is itself inside a red border. The text 'A6 Landscape Right Inside Page' is located in the top-left corner of the white page. The red border is the outermost frame, followed by a yellow border, and then a white page area.
